### **IAPMO R&T Streamlines Listing Process with Online Applications**

Ontario, CA (April 12, 2007) – IAPMO Research and Testing (R&T), a trusted leader in plumbing and mechanical product evaluation, has made it easier than ever to list your product and get it to market faster.

IAPMO R&T's new online Product Listing Application is a quick, simple way to jumpstart the listing process. Instead of waiting for an application in the mail, manufacturers can now take control of their Product Listing Applications by creating an account on the [IAPMO R&T website](#), where they can submit information online, check on current applications, make modifications or additions to existing files, and even list new products.

"We've streamlined the listing process even further by giving manufacturers the tools to manage their applications online," said Dawn LaFleur-Qualley, project manager at IAPMO R&T.

"Simply by [logging on](#) to the R&T website, manufacturers can view their application status at a glance."

For more information on applying for your company's product listing online, call IAPMO R&T at (909) 472-5527 or visit <http://www.iapmo.org/rnt/online-listing.asp>.
